

CITIG

CANADIAN INTEROPERABILITY TECHNOLOGY INTEREST GROUP
GROUPE D'INTÉRÊT CANADIEN EN TECHNOLOGIE DE L'INTEROPÉRABILITÉ

Preparing for a National Interoperable Emergency Broadband Network

Proudly governed by:

**Presentation at the FCM 2013 Annual
Conference and Trade Show**

3:30 to 5:00 p.m., Friday, May 31, 2013

Welcome...

Deputy Chief Bill Moore, O.O.M.
Halifax Regional Police Service
and CITIG Chair

CITIG's Mission

To improve Canadian public safety interoperability at home and abroad through collaborative efforts, innovation and leadership

Two Hot Button Issues

- 700 MHz broadband for mission critical public safety broadband
- Next Generation (NG)9-1-1

700 MHz & NG9-1-1

- Enhanced Public Safety
- Increased Responder Safety
- Improved Resource Allocation
- Support for Decision-Making
- Improved Cross-Discipline Communication
- Improved Response Times
- Improved Patient/Customer Care

Why is 700 MHz for **DATA** so important?

- Today, Canadian public safety entities use existing commercial networks for their data needs
- Some 700 MHz narrow and wide band spectrum is already dedicated to public safety in Canada for voice and some low speed data use
- However, securing dedicated spectrum for broadband **DATA** applications for public safety will ensure wireless broadband networks can be built with the needs of public safety in mind
- Take advantage of World standard LTE 4G for **DATA**
- DOES NOT replace need for Land Mobile Radio

Why is 700 MHz so important?

- With advances in technology, Canadian agencies will have an increasing need to access data and video networks during all emergency incidents
- Availability of such networks responds directly to the Canadian tri-services identified priorities of improved interoperability and integrated emergency management -
- spectrum allocations are a key enabler for the creation of such a network
- Above all, Canadians will be safer if responders have the ability to provide services with the most up-to-date technology enabled by spectrum dedicated for public safety

Present State of Broadband in Canada

- Different technologies in use
- Different systems in use
- Not seamless ability for wireless broadband nationwide
- No Canada-U.S. harmonization
- Thirst for public safety bandwidth increasing exponentially
- If done correctly will enable mission critical data communications for public safety for years to come
- Having this ability directly impacts community and responder safety, innovation and the health of Canada's digital economy

Call to Action!

Web site created by CITIG to provide a focal point for communications efforts:

www.action700.ca

(download basic information, including recent media release, and sign up for e-mail updates)

Questions? Send emails to:

action700broadband@gmail.com

It's Official: Canada has 10 MHz!

(But we still need the full 20 MHz...)

- Industry Canada (FCC) Minister Paradis announced on March 14, 2012 that 10 MHz will be allocated in Canada for “public safety use”
- Second round of consultation for the additional 10 MHz of spectrum (D Block) completed. Awaiting announcements.
- Working with Senior Officials Responsible for Emergency Management (SOREM – all Provinces & Territories), Public Safety Canada & FCM on an almost daily basis
- Ties directly to US efforts to leverage the same spectrum for a nationwide “FirstNet” effort by Municipalities, States & responders

Thoughts on how to pay

- Public safety agencies will continue to pay user fees to access the network – but now to new entity
- LTE Infrastructure/operations with P3 partnerships
- Amend the Building Canada Fund to include communications networks to help F/T/P/M agencies (letters to Minister Label & Flaherty, cc Toews)
- Reduce or eliminate Industry Canada spectrum licence(s) fees
- Seek federal funding to help set up administrative body (eventually self sustaining)
- TBA — governance/business model work continues

Innovation, Jobs & Economic Development

- 700 MHz issue ties directly to Canada's history of innovation
- Communities that take a leadership role in implementing broadband, including 700 MHz, and supporting R&D activities can benefit via jobs & economic development
- CITIG working with communities & industry wishing to understand/exploit these opportunities.

Multiple meetings between CITIG and Government of Canada, including Ministers, regarding 700 MHz & opportunity to see it not only as a public safety capability but an innovation & economic development driver

Next Generation 9-1-1 (NG9-1-1)

Next Generation 9-1-1: A Game Changer

- According to CWTA: 26,874,569 Cell Subscribers in Canada in 2013
- More than 50% of the adult population has mobile smartphone devices
 - Smartphones generate 35 times more data traffic than basic cell phones, while tablets generate 121 times more traffic
- By 2014, most internet traffic will be via mobile devices
- Voice communications are on the decline, and account for less than 1/3 of mobile usage

How NG9-1-1 is Different

- Technology (IP Packet Based vs Circuit Switched)
- Interoperability
 - No longer a “local” service only
 - Interoperates at city, region, province and national levels
- Functionality
 - Replicates E9-1-1 capabilities
 - Adds new capabilities
 - Wide ranging additional data options
 - GIS-based instead of tabular data for location validation and routing control

What's Driving NG9-1-1?

- Newer technologies/services
 - Text, image, video, telematics, sensors, subscriber info, emergency location info
- Need to “mainstream” 9-1-1 technology
- Improve survivability
 - Network resilience, virtual PSAPs
- Improve interoperability and information sharing

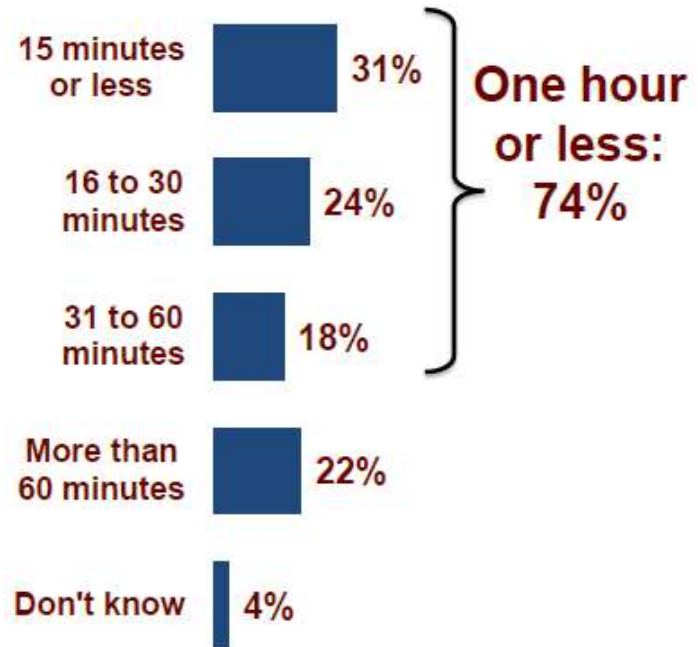

Canadian Red Cross Survey

RESPONDING TO CALLS FOR HELP

1/3 think emergency services would respond to a request for help on a social media site

Amount of time it would take for emergency services to respond to a posted request for help

Fewer respondents aged 18-34 expect response time to be one hour or less (61%)

<http://bit.ly/ZkKYaX>

Current Work in Canada

- Dec. 17, 2012, CRTC issues a Notice of Consultation regarding the appointment of an Inquiry Officer to review matters related to 9-1-1
- CITIG & Tri-Services coordinated responses from across Canada to ensure a consistent message delivered
- Research shows that NG9-1-1 will require significant increases in resourcing (up to 30%) to implement.
- While 9-1-1 developed slowly over many years, NG9-1-1 requires a high degree of coordination
- CITIG & Tri-Services working with F/P/T/M partners to develop a five year strategy & action plans

CRTC Consultation

- Need to make understanding impacts of Next Generation (NG) 9-1-1 a priority
- Disconnect in what public perceives current 9-1-1 can do (need to raise awareness – ex. Canadian Red Cross Social Media study)
- Two key issues are Governance/Coordination & funding!
- Other issues include liability, capacity, change management
- CRTC Consultation was an excellent impetus for new national dialogue on NG9-1-1

CITIG's response to CRTC informed by many...

NG9-1-1 National Governance and Coordination Workshop

Hosted by:

In Partnership with:

Sponsored in part by:

With special thanks to:

The Canadian Interoperability Technology Interest Group (CITIG) is proud to announce a two-day workshop designed to chart the future of Next Generation 9-1-1 (NG9-1-1) governance and coordination in Canada. This event strives to gather participants from a cross section of disciplines, industry, government and academia to work collaboratively on:

- recommending an appropriate governance and/or coordination structure to advance the NG9-1-1 agenda in Canada in an efficient, effective and objective manner;
- exploring potential funding mechanisms; and
- prioritizing the work needed to implement NG9-1-1 in Canada.

Who should attend:

- Public Safety Answering Point (PSAP) providers;
- Tri-service responders, communicators and leaders;
- Emergency management and government officials from all levels of government;
- Industry members including, but not limited to, telecommunications providers; and,
- Academia and other interested researchers including S&T and R&D

Keynote Speaker: CRC
Commissioner Timothy Devlin,
Industry Officer to review matters
related to 9-1-1

Dates: June 10 and 11, 2013

Location: Marriott Ottawa, 100 Kent Street, Ottawa, ON K1P 5R7. CITIG Conference Rate of \$149 plus taxes per night (Room block held until May 17, 2013), Direct Hotel Reservations: (613) 238-1122, Toll Free: 1-800-853-8463 or visit www.citig.ca for the link to on-line registrations at the discounted rate.

Cost: \$150 for Public Officials and \$250 for Industry.

For more information and to register, visit www.citig.ca.
Spaces limited, register today!

Please note that space at this Workshop is highly limited, so register early. Registration includes access to the Workshop on June 10 and 11, 2013, all meals, a continental breakfast, lunch and access to Workshop materials on our Web site. All expenses will be conducted in English.

Additional CITIG Recommendations

- That every Province and Territory that currently does NOT have PSAP funding legislation create it
- 100% of fee funding received be set aside for the sole use of improving such public safety communications systems
- That a National PSAP Registry be created
- Public Safety community research Cloud Computing & other ways to leverage new technologies & reduce overall costs

**The Seventh Canadian Public
Safety Interoperability Workshop**
November 24-27, 2013 | Vancouver, BC

CITIG SEVEN
**"BEYOND TECHNOLOGY: BUILDING A
CULTURE OF INTEROPERABILITY"**

Join us for Canada's premiere communications interoperability event from November 24 to 27, 2013 in Vancouver. The Seventh Canadian Public Safety Interoperability Workshop, widely known as CITIG Seven, will open focus on information exchange, topic-specific discussion and interactive break-outs to support and promote the transfer of best practices and experience, and the development of a more unified approach to public safety interoperability across the country, between nations and internationally.

From early adopters leading the effort to those still in discovery mode, you will be put to work! CITIG Seven is the only comprehensive, highly interactive event in Canada dedicated to addressing key voice and data interoperability issues facing today's public safety sector.

www.citig.ca

TARGET AUDIENCE

Interoperability leaders and practitioners from:

- First responder agencies (law enforcement, fire, paramedic, emergency management)
- Other public safety providers (federal, provincial, territorial, municipal)
- Military and Coast Guard
- Government agencies and utilities
- Non-governmental organizations in the emergency response and humanitarian aid sphere
- Academic and research institutions
- Industry professionals

LOCATION OF WORKSHOP/ACCOMMODATIONS

The Rimont Hotel Vancouver, 900 W Georgia St, Vancouver, BC

CITIG Workshop Rate: \$159 plus taxes per night

Call: 604-684-3131 or 1-800-441-1434

Room Block Held until October 16, 2013 (prices are not guaranteed after this date)

REGISTRATION FEE

\$495.00 + GST (includes all plenary sessions, Monday evening exhibition reception, three breakfasts, two lunches and five refreshment breaks)

For more information regarding programming, registration or accommodations please visit the Canadian Association of Chiefs of Police website at www.ca.cops.ca. For those without internet access, please call 613-595-1101 for further assistance.

****Please note workshop sessions will only be offered in English****

CITIG 7 right here in Vancouver November 24th to 27th!

"INFORMATION MANAGEMENT: A CRITICAL SUCCESS FACTOR IN THE ECONOMICS OF POLICING"
The CACP Information & Communications Technology Workshop

February 23 - 26, 2014
The Fairmont Hotel Vancouver
Vancouver, BC

Workshop Objectives

- Understanding Information Management and the critical role it plays in law enforcement
- Harnessing Information and Communications Technology in challenging economic times
- Maximizing service delivery through partnerships and innovation
- Enabling a mobile workforce in times of increasing cyber threats
- Leveraging Business Intelligence & Analytics to improve community safety
- Examining the challenges and opportunities of emerging technologies including NDS-1-1

Target Audience
Law Enforcement leaders & practitioners from:

- Police
- Justice
- Law Enforcement Agencies
- Other public safety providers
- Government agencies (federal, provincial, territorial, municipal)
- Academic and research institutions

Location of Workshop / Accommodations
The Fairmont Hotel Vancouver
900 W Georgia St, Vancouver, BC
CACP ICT Workshop Rate:
\$159 plus taxes per night
Call: 604-684-3131 or 1-800-441-1414
Room Block: Held until January 22, 2014
(prices are not guaranteed after this date)

Registration Fee
\$495.00 + HST
(includes all plenary sessions, three breakfasts, two lunches and five refreshment breaks).

For more information regarding programming, registration or accommodations please visit the Canadian Association of Chiefs of Police website at www.cacp.ca.

For those without internet access please call (813) 595-1101 for further assistance.

 @CACP_ACCP & #CACPICT

CACP ICT Workshop in Vancouver February 23rd to 26th!

How Can You Help?

- Join CITIG – it’s free!
- See interoperability as a “strategic risk management” issue and one that requires high level “buy-in” and support – not just “technology” issue.
- Ensure your jurisdiction actively participates in Provincial & Territorial efforts in support of public safety broadband & NG911.
- Support Public Safety Call for additional 10 MHz!
- Attend CITIG & Tri-Service interoperability events.

Thank You!
